

CONSTRUCTION

Design. Build. Succeed.

Grow Your Facility.

Complex construction jobs with fast timelines require an experienced, safe team to ensure the project gets up and running quickly.

With experience in civil/structural, piping, fabrication, mechanical, and instrumentation and electrical services, H+M Industrial EPC's in-house professionals have the knowledge and skill to safely execute your project on schedule and with minimal change orders. Plus, we have a comprehensive quality assurance/quality control (QA/QC) plan to ensure your project meets or exceeds the specified performance criteria.

+We Provide

- Equipment Installation
- Skid Fabrication
- Drum & Tote Filling Stations
- Emissions Control Systems
- Piping Installation & Fabrication
- Pump & Metering Stations
- Site Development
- Tank & Equipment Foundations
- Facility Demolition & Relocation

Our experience and awareness of our construction capabilities and processes mean we can also provide you with an accurate construction cost estimate, allowing you to submit your approval for expenditure (AFE). We tailor our cost estimates based on your priorities, and are dedicated to increasing price certainty so that your project will not experience unexpected costs or delays as a result of overrun budgets or multiple change orders.
