

DETAIL DESIGN

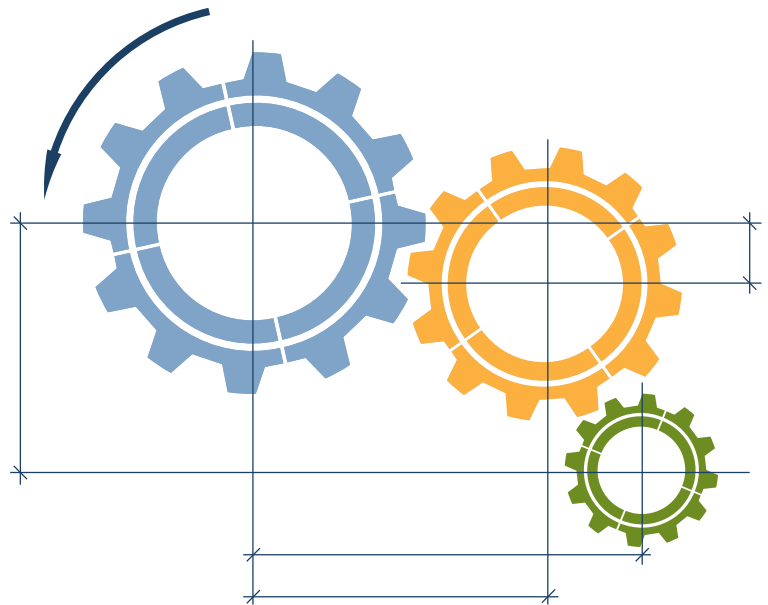

Design. Build. Succeed.

Benefit from Quality Designs.

Drawing on decades of experience and skill, H+M Industrial EPC's in-house, full-service engineering department offers an accurate detail design process that considers the many factors needed to keep your project on budget and on schedule.

+We Deliver

- Multidiscipline Engineering & Design
- Specifications
- 3D Capabilities
- Model Reviews
- Constructability Reviews
- Procurement Services
- Construction Bid Packages
- Cost Estimates
- Project Management

Our design team works closely with your project personnel to deliver accurate, executable drawings that fit your project needs. We review your requirements to develop the detail design, address any final technical or logistical concerns and provide a package your construction contractor will have confidence in.

By producing high-quality detail designs, we save you money by minimizing change orders and rework. You also gain peace of mind knowing that the construction bids you receive from our packages will be complete.

“Implementation per H+M’s designs has proven their competence and thoroughness with good constructability reviews, minimal rework and continued prompt support during construction.”

– *Projects Manager for International Petrochemical Company*
