

# HEALTH & SAFETY

Design. Build. Succeed.

## Take the Safest Route.

A safe workplace leads to greater productivity and quality craftsmanship, which is why H+M Industrial EPC's management team constantly strives to find safer, more efficient ways to complete projects. Above all else, we recognize that performing a job safely is just as important as meeting a deadline and producing quality work.

### +Our Track Record

- Over 7 years worked without a Loss Time Injury
- ISNetworld Featured Contractor
- Member of PICS and NASAP

People and their safety are our top priority, and we've built a strong safety culture that we live and work by at your facility and ours. Every employee feels responsibility for one another and works hard to develop creative solutions that will keep everyone safe, productive and on the job. We encourage our employees to stop any job he or she feels might cause harm to himself, his surroundings or others, and we promote safety awareness, constant communication and safety education.

Our memberships in organizations such as ISNetworld and PICS enable us to keep employees current on site-specific training, maintain record keeping and demonstrate our dedication to safety.

“H+M continues to focus on safety when performing jobs for us. Their leadership team is one of the best I've seen. They not only deliver, but also always follow up on the work they've completed to ensure customer satisfaction.”

– Terminal Supervisor at Energy Partnership Providing Integrated Midstream Services
