

VESSEL FABRICATION & REPAIR

Design. Build. Succeed.

Our Resources are Yours

With an experienced team of craftsmen, engineers and QA/QC personnel, H+M Industrial EPC can cost-effectively engineer, fabricate and deliver custom ASME pressure vessels and storage tanks that meet your exact specifications. With all work performed in-house, we offer greater quality control and shorter turnaround times, resulting in a high-quality product that is delivered and installed at your facility on schedule.

+ We Design & Fabricate

- Tanks up to 12' x 50'
- Pressure Vessels up to 12' x 50'
- Filter Pots
- Pig Launchers/ Receivers

Our engineering team prepares detailed CAD fabrication drawings that meet your requirements. Working with a variety of metals and alloys, our fabricators have extensive knowledge of compliance codes and standards, ensuring that your vessels are built to operate safely and efficiently at design pressure.

When your pressure equipment is no longer capable of operating at original design pressure or capacity, we can evaluate its condition and then make repairs. With simple repairs and maintenance, you can maximize your equipment's performance and lifespan, and avoid costly and time-consuming replacement of the equipment itself.

+ In-shop or On-site Repairs

- Tanks
- Vessels
