

# FRONT-END DESIGN

Design. Build. Succeed.

## Get Ahead with an Accurate Project Scope.

H+M Industrial EPC communicates closely with you during the front-end engineering and design (FEED), ensuring our project scope aligns with your project-specific requirements and goals.

### + We Deliver

- Equipment Selection
- Process Simulation
- Preliminary Layout
- PFD & P&ID Development
- HAZOP & PHA Support
- Overall Project Schedule
- Budgetary Cost Estimates
- Preliminary Hydraulic Analysis
- Process Optimization
- Heat & Material Balance

Our FEED process provides a stronger understanding of the technical requirements and approximate investment cost for your capital project, and includes recommendations that will improve your return on investment.

Specifically, by providing an accurate project scope, we minimize rework and markups, and help you avoid major change orders during later phases. We're also able to adjust the project scope to meet your budget and timing, ensuring the necessary funding is allocated for your project to be completed with minimal delays.
